

TECHHUSET

QUALITY, RELIABILITY, AND QUICK, FLEXIBLE ENGAGEMENT

We are specialists in project management and engineering services for building and mechanical development. Our consultants are the best. They are selected according to their expertise, project experience and their ability to work independently and in teams. They often come with many years of professional experience and can in this way add significant value to the project tasks.

CONSTRUCTION

We possess exceptional specialist expertise within the construction industry, with particular proficiency in technical drawings, project management and complex construction tasks using industry-leading platforms such as:

- Revit
- BIM360 / IKT Management
- AutoCAD
- MagiCAD
- TEKLA
- Primavera

Our team comprises more than 40 highly skilled consultants, each with extensive experience in delivering large-scale and complex assignments across construction, design, technical development, project management, and quality assurance. The majority of our consultants hold specialised certifications within their respective fields, ensuring a consistently high standard of professionalism and technical precision.

Advanced experts and tailored solutions

Our construction and mechanical engineering consultants bring extensive industry experience and a high level of technical expertise, ensuring that every solution is grounded in solid knowledge and professional insight. Our diverse team includes engineers, design engineers, technical designers, project managers, and quality assurance specialists, enabling us to operate effectively in a wide range of environments and across multiple languages.

We tailor our resources to the specific requirements of your project, ensuring you receive the most effective guidance and support for your unique challenges. Where required, both hardware and software can be incorporated into the agreement, providing you with a complete, customised solution.

MACHINERY

Within the machinery industry, our experts provide specialised support to industrial and manufacturing companies across a broad range of areas. We also bring proven experience from projects within the food, pharmaceutical, medical technology, and agricultural sectors. technical drawings, project management and complex construction tasks using industry-leading platforms such as:

- Autodesk Inventor
- SolidWorks
- Creo
- Primavera
- AutoCAD
- Vault
- Solid Edge

Our expertise encompasses a wide range of areas, including conveyor systems, industrial facilities, grippers, steel structures, machine design, production plants, prototype development, and much more.

On-demand resources

We provide a unique scalability model that enables you to tailor our involvement in your projects precisely to your needs. You can seamlessly increase or reduce the number of consultants engaged, ensuring you only pay for the services required at any given time. This approach offers optimal flexibility while minimizing the risk of being tied to commitments that no longer align with your company's evolving situation.

Our readily available expertise ensures your projects progress smoothly, without unnecessary delays or interruptions.

With consultants experienced across a broad spectrum of tasks, we are always equipped to match the right expert to your company's specific requirements and objectives.

Tech-Huset A/S was founded in 2019 by Ida Storm and Thomas Esbjerg, who today are still part of the ownership group and company management.

Our headquarters is located in Kolding, where our administration is located. We are nationwide with offices in Kolding, Copenhagen and Esbjerg. Our consultants have the possibility to work remotely, on-site or in a combination of these.

We are a consultancy primarily aimed at construction, production and mechanical industries, where we offer consultancy services to handle project tasks within technical drawing and construction tasks as well as project management roles and project development tasks. We have a mix of both permanent employees, project employees and freelance consultants who are permanently attached to Tech-Huset.

Our mission is to provide high-quality technical expertise and consulting services to our customers in the construction, manufacturing and mechanical engineering industries, thereby helping them achieve their goals and deliverables on selected project assignments.
